- ✓ Up to 10 meters of span between support points possible

Agri

Since our establishment we have a lot of experience in the agricultural market. Over the years our VC-Conveyor has provided loyal service to many satisfied customers.

Within the agricultural market, the conveyor belt is mainly used to transport poultry manure. For which this conveyor is ideal. The conveyor belt is reliable, has a long lifespan and is maintenance friendly.

Industry

The VC-Conveyor is for great value within the industrial market as well. The solid tube construction makes it possible to handle goods with a specific weight up to 750 kg/m³. This mainly concerns the transport of bulk goods such as sand, gravel, peat and various shredded products.

Every project is customer-specific engineered, so the conveyor is always suitable for your plant or factory.

Additional options

Depending on your needs and area of application, various additional options can be chosen.

Examples are:

- Special scrapers
- Supports
- Hoppers
- Manure drying system
- Rain caps
- Star screen
